BIO

Software Quality Assurance Engineer with **2+ years of experience** testing web-based business applications, including POS systems, staff management platforms, event management software, accounting systems, e-commerce applications, and multi-tenant SaaS products. Experienced in manual testing, test case design, exploratory testing, API validation, defect reporting, UI/UX verification, and regression testing.

Currently expanding automation testing expertise using Playwright to automate critical end-to-end workflows. Strong technical foundation in web development, REST APIs, databases, and browser debugging enables efficient root cause analysis and effective collaboration with development teams.

SKILLS

Quality Assurance — Manual Testing | Test Case Design | Test Execution | Regression Testing | Smoke Testing | Sanity Testing | UI/UX Testing | Cross-Browser Testing | Responsive Testing | Bug Reporting | Test Documentation, **Automation Testing** — Playwright | Basic Test Automation | End-to-End Testing, **Testing Tools** — Postman | Chrome DevTools | Browser Developer Tools | Trello | Git, **Others** — Agile | Scrum | Team Collaboration | Figma | Github

PROFESSIONAL EXPERIENCE

Cashless Ai, SQA Engineer 01/2026 – Present | UK (Remote)

- **Designed and executed 150+ test cases** covering POS, staff management, and event management workflows.
- **Identified and reported 140+ defects** with detailed reproduction steps, helping reduce production issues before release.
- Validate responsive behavior across browsers and devices using browser developer tools.
- Collaborate closely with developers and product teams to ensure high-quality releases.
- Develop **automated end-to-end test** scripts using **Playwright** to improve testing efficiency and regression coverage.

ByteBridge IT Solutions, SQA Engineer 12/2023 – 05/2025 | UAE (Remote)

- **Designed and executed 250+ test cases** covering accounting, investment, e-commerce, and employee management applications.
- **Identified and reported 280+ defects** with detailed reproduction steps, helping reduce production issues before release.
- Performed functional, regression, exploratory, and usability testing.
- Verified front-end implementation accuracy, responsive layouts, and cross-browser compatibility.
- Used Chrome DevTools for debugging UI, network, and API-related issues.
- Reported defects with detailed reproduction steps and collaborated with developers to verify fixes.
